The scope of the PFDA covers all theoretical and experimental aspects of fractional differentiation and related approaches. Reviews, letters and

Fractional-Order Dynamics of Cardio-Respiratory Oxygen Transport: A Stable Regulator of Human Endurance and the Boundary of Chaos

Aashima Bangia, Rashmi Bhardwaj, Asokan Vasudevan, Naeema Darwish Khamis Al Maashari, Yafang Yan Khin Yadanar Htun, Fxx, J can be intended as, Consecutively, Characteristic Polynomial, Definition: Grunwald-Letnikov Derivative, Theorem: Riemann Liouville Fractional Derivative (RLFD, Now, Whenever, Definition: Caputo Fractional Integral, having initial conditions, it becomes, Thus, Therefore, Phase, Stable, Critical (extended model, Chaotic (extended model, Fractional order, $\arg \lambda$, min (rad, Regime, Yes, Stable focus, Parameter; Description, Values, sec, Maximum lung volume, second, Breathing-period, s inhale, s suspension, s exhale i.e, minute, Year, Parameters, Results, Teka W.W. et al, Numerical simulations plotted, Ghita M, Copot D, Ionescu C.M, Li Z, Pei Y, Wang Y, Tian Q, fractional calculus, Alharbi. N, Present study and Fractional Ordered Kinesiology Model

027326AJSAP07302601A

original research articles dealing with topics such as fractional and integral equations, fractional discrete calculus and fractional dynamics are welcome. The original submissions concerning both theoretical and the applications of fractional differentiation in numerical analysis, mathematical analysis, signal analysis, bifurcations, statistics, data analysis, time series analysis, chaos, bioengineering, economics, finance, fractal theory, optics, control systems, artificial intelligence, fractional differential equations with uncertainty, mathematical biology and nanotechnology are encouraged.

We are very pleased to inform you that your paper has been accepted for publication in our journal and will be published in the next upcoming issue.

Your research contribution has added significant value to the field, and we appreciate the effort you have put into this work. The paper has been reviewed by our editorial board and has been accepted based on the high quality of research and new work presented.

To ensure that your paper is published on time, please submit the final version of the manuscript with the required formatting within 5 days.

We look forward to future collaborations and thank you for your contribution.

A handwritten signature in black ink is written over a circular blue stamp. The stamp contains the text "Natural Sciences Publishing Co." around the perimeter and "NSP" in the center, with a small flame icon above the letters. The signature appears to be "C. N. S.".

To be considered for publication, your introduction should clearly explain the novelty, urgency and originality of the research in your article. All manuscripts submitted to Information Sciences Letters will be checked for originality using the CrossCheck database. For more information on CrossCheck please visit <http://www.crossref.org/crosscheck.html>
